**ACTUAL SCIENTIFIC AND APPLIED CONTRIBUTIONS
IN THE ATLASES ON THE NEW EDUCATIONAL PROGRAMS
FOR 2018-2019 IN BULGARIA**

Veneta Kotseva (BG)

ABSTRACT

An analytical review of the educational atlases published in Bulgaria according to new educational programs on 'Geography and economics' for 7, 8 and 9 classes, on 'The man and Society' and on 'History and Civilization' has been performed. The maps included into these atlases have been analyzed from cartographic point of view. The editions are with high quality of the content and polygraph of Bulgarian-Canadian firm DATAMAP EUROPE Ltd. They are a new serious contribution into the educational and atlas cartography in this country as well as into our national cartography as a whole.
