MODERN TECHNOLOGIES, EDUCATION AND PROFESSIONAL PRACTICE
IN GEODESY AND RELATED FIELDS**

Sofia, 08 - 09 November 2018

**DEM FOR THE TERRITORY OF BULGARIA –
DEVELOPMENT AND APPLICATIONS**

Grigor Nikolov (BG)

SUMMARY

An overview of the available information on Digital Elevation Model (DEM) for the territory of Bulgaria is outlined. Methods of collecting the data, their processing and the Earth surface's mapping are presented. A brief historical review of the sources of DEM creation in several institutions in the country, data processing, available DEMs, reference data and their applications is also considered.
